NOPcon International Hacker Conference

written by Mert SARICA | 6 November 2019

On Friday, November 22, at the NOPcon International Hacker Conference to be held in the Turkey’s capital, Ankara, I will be giving a presentation titled “Sandbox Detection” after a 7-year hiatus.

I will be answering the question, “Why don’t you come to Ankara ?” by giving a presentation at this esteemed conference, and I look forward to meeting with cybersecurity enthusiasts!
